Note—Pupils who did not pass will be promoted to grade 8 if they are successful in September exams.

### Drumheller Defeats Carbon Team

The Carbon Junior Baseball team went to Drumheller on Wednesday afternoon to play ball with the Junior team of that town, but suffered defeat to the score of 5-4 in favor of Drumheller.

The game was called for 6 p.m., but the Drumheller players did not arrive on the scene until about 7 p.m., thus delaying the game and making it late before the game was finished.

Both teams played good ball all the way through, and judging by the score few errors took place.

The line ups were as follows:

Drumheller	Carbon
McKinley	c. MacDonald
Anderson	p. McClure
Gillender	1b. Ramsay
Currie	2b. Moffat
Barbero	3b. Doerksen
Leach	s.s. Pimm
McDonald	l.f. Poxon
Shandro	c.f. Edwards
Berardo	r.f. Gallech

The Drumheller ball team is to play Carbon here on Wednesday, July 19th.

## LEAVING FOR THE FASHION CENTRES ON BUYING TRIP

I. Chertkow, of Drumheller

Mr. I. Chertkow of Drumheller's most popular ladies and childrens wear store "Tony's Ladies Wear Ltd." left Sunday for the fashion centres on a months buying trip.

During the time Mr. Chertkow plans to make visits to: Toronto, Montreal, Boston and New York with a sole object in view in bringing back to Drumheller the latest fashion creations in ladies and childrens wearing apparel.

From a small beginning to the store he now occupies in Drumheller has been enlarged practically to double its former size, modern in every respect and compares with any of the biggest cities specialty shops. All these improvements are a reflection of the good taste and ability of Mr. Chertkow and the support of the buying public of Drumheller and the vicinity who know that quality and moderate prices go hand in hand at "Tony's" while nothing but the newest and most fashionable merchandise is handled by him.

Mr. Chertkow stated that he was more than pleased at the opening response to his annual mid-summer clearance sale and he hopes to be able to pick up several good buys to incorporate in this event before his return.

## VILLAGE COUNCIL LETS CONTRACT FOR GRAVEL

At the regular meeting of the Village council tenders were let for the gravelling of the roads of the Village and for new sidewalks and culverts which are being built.

The draymen of the Village all joined together and put in one tender for the whole job and as there was no other tender they secured the contract. On Monday work was commenced on the gravelling of the roads and the building of the side walks and it will not be long before Carbon will be able to boast of having the best roads of any village of its size in the Province.

### FOR SALE

FOR SALE—Two M-H binders \$50; Fifteen barrel galvanized water tank, with cover, \$15; Twelve squares painted tin siding new, \$75; Four disc M-H horse plow, nearly new, \$125; 100 rods used hog wire, good condition, 25c a rod; U.G.G. Spring tooth cultivator, \$60.

C. M. Ross, Swalwell

The date of the Carbon School Fair has been set for September 13.

## LITTLE ITEMS OF LOCAL INTEREST

The final game in the Carbon Tennis Tournament was played at the tennis court on Friday night last, C. Wiertz and Mrs. Peters defeated H. Edwards and Mrs. Laing 2-6 6-3 6-4.

The dates of the Carbon Chautauqua have been set for August 4-6-7-8.

—Paul Hotson, Jeweler, optometrist, of Acme, will be in Carbon every Thursday at the optical room lately occupied by Mr. Toombs. Entrance through T. R. Olives office. Have your glasses fitted, lenses changed by an expert in your own town.

Mrs. Wright, Bert and Edith motored to Calgary on Monday to attend the Stampede.

Mrs. MacDonald left on Wednesday for a trip East.

Mrs. J. Ramsay was a Calgary visitor this week.

The Hesketh Sports Day will be held this year on Friday, July 20th.

I. Guttman spent Monday in Calgary and took part in the parade.

R. Barr was out from Calgary over the week end.

Mr. and Mrs. Jas. McLeod left last Sunday and will spend a couple of weeks on a motor tour to Sylvan lake and other points.

Mr. and Mrs. L. Poxon and Francis and Cyril, motored into Calgary on Sunday and will attend the Stampede this week.

The Elk's Lodge wish to thank all those who assisted in making their free picnic for the children such a success.

Bert Tricker of Swalwell was a Carbon visitor on Thursday last motoring over in a new Durant car.

Mr. and Mrs. G. Harmston and W. Poxon Jr. went into Calgary yesterday to attend the Stampede. They expect to return tonight.

J. J. Greenan was a Calgary visitor on Monday and returned that evening.

## INVESTIGATION IS HELD REGARDING NEGLECTED CHILDREN

An inquiry was held on the information of Inspector Brooks, of the Neglected Children's Department, before police magistrate I. U. MacLennan of Swalwell on Thursday July 5, in the Alta. Police barracks at Carbon, when it was learned that Mrs. Tabert had been neglecting her children and the decision was based on information from the following witnesses: Mesdames S. F. Torrance, R. J. Fairbairn, R. C. Barr, and Const. Moriarty, Inspector Brooks and J. A. MacDonald, and the children were placed in the Children's Shelter in Calgary, the cost to be met by the Village of Rimbey, where the family resided for four years prior to their coming to Carbon about five months ago. Mayor Bealey and one of his councillors, were present from Rimbey.

### Co-operation Rather Than Discord

It has been one of Canada's greatest misfortunes that periodically throughout its history campaigns have been inaugurated having for their object the division of the people into rival camps divided by lines of racial and creed difference. Probably no one thing has in the past operated quite so disastrously to retard the growth and national development of Canada. Time and time again when some large national question was up for decision, the issue turned, not on the merits of the question and the national policy involved, but upon some petty race and creed cry. One of the outstanding cases which is still fresh in the public mind was the Reciprocity election of 1911 when, in the last two weeks of the campaign, Ontario was swept by one of these insidious cries, and tens of thousands of voters were stampeded from support of their economic convictions in favor of freer trade and wider markets.

Throughout his long career, both in private and public life, Sir Wilfrid Laurier pleaded and strove for unity and concord among all classes of the Canadian people. Hon. Mackenzie King is worthily upholding the same cause, and it is gratifying to note that Hon. R. B. Bennett, as leader of the Conservative Party in the Dominion, is throwing the whole of his eloquence and influence in the same direction. Speaking at Magog, in the Eastern Townships of Quebec, last month, Mr. Bennett said: "He who sows seeds of discord and distrust in racial and religious matters is a greater enemy to Canada than one who came with an armed force. You cannot develop a country by ill-will, hatred or contempt." A few days later at Coaticook, Mr. Bennett used these words: "The application of the Golden Rule in the life of a nation is quite as important as it is in the life of an individual," and he added that anyone who "in the heat of an election sought to raise old animosities, to sow seeds of discord, must not forget his responsibility for such unjust action."

Here in Western Canada it is absolutely vital to the welfare of the country that such words be heeded. To an ever increasing degree the people of the West are looking to and relying upon co-operative movements and enterprises to solve the economic problems of the country. To date these have attained a marvellous success in a comparatively short space of time. This has been accomplished by all classes, all creeds, people of all racial descents, in town and country, working together. There has been no lines of demarcation in the upbuilding of these large co-operative organizations. The Wheat Pools of the West, for example, could never have attained their present proportions and power had any such foolishness as so often enters into political campaigns been allowed.

The unfortunate fact remains that if the people of a Province or Community are stirred up and divided upon racial or religious lines for partizan political purposes, or for any other reason, the inevitable result is to create suspicions and animosities in the community, or throughout the Province, which makes it extremely difficult, if not impossible, to get all classes together, or hold them together, in a true spirit of co-operation. If the people of the West are divided into Catholic groups and anti-Catholic groups, English-speaking groups and non-English-speaking groups, it naturally becomes impossible for them to come together in the right spirit of friendliness and co-operation which is so essential to the maintenance and development of such organizations as the United Farmers, the Wheat Pools, and other co-operative organizations.

These racial and religious campaigns have never got their proponents anywhere, have never accomplished good but have always resulted in harm. They are in no sense constructive but always destructive. Despite any and all claims that may be made for them they are the reverse of British and open denial of that liberty and freedom which, it is our proud boast, is to be found and is guaranteed to all under the British flag.

Not only are these unscrupulous campaigns destructive of a real national spirit; not only do they retard national growth, development and prosperity; they render the task of government, whether in the Dominion and Provinces, or in municipal councils and school boards, difficult and sometimes impossible, and in all cases more expensive and less efficient.

Western Canadians, interested in the growth of their country, loyal to its interests, and committed to the policy of co-operation for the common good of all, should most emphatically set their heel upon the ugly head of the serpent of racial and religious ill-will whenever and wherever it may raise itself.

#### Canada Mineral Industry

Capital employed in Canada's mineral industry in 1927 increased nearly \$18,000,000 over the previous year. The mineral output was valued at \$218,385,031, an increase of 4.6 per cent. over 1926.

#### B.C. Agricultural Production

Agricultural production in British Columbia in 1927 totalled \$76,999,269, the largest sum on record, an increase of 7.89 per cent. over the previous year. Exports of agricultural products increased by 19.23 per cent.

## Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain de-

parts. You are happy again in five minutes. Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

#### New Quarters For Wheat Pool

Central Office Building To Be Constructed In Winnipeg

The Canadian Wheat Pool, a farmer's organization, which handles more export grain than any other organization in the world, is to be housed in a new central office building to be constructed in Winnipeg immediately. The building will be 60 feet by 120 feet, of thoroughly modern construction, faced with Manitoba stone and will cost \$600,000.

The turnover of the Canadian Wheat Pools which will be directed from this office exceeds an average of a million dollars a day.

### ST. VITUS DANCE

A Trouble That Usually Attacks Young Children

St. Vitus dance is the name generally given to a disease described by medical men as chorea. This trouble usually attacks young children, though older people may be afflicted with it. The most common symptoms are a twitching of the face and limbs. As the disease progresses the twitching takes the form of spasms, in which the jerking motion may be confined to the face or all the limbs may be affected. Frequently the patient is unable to hold anything in the hands or walk steadily. In severe cases the speech is often affected. The disease is due to debility of the nerves and relief comes through an enriched blood supply. Dr. Williams' Pink Pills have been most successful in reaching this trouble through their specific action on the blood, which it enriches and purifies. The following instance proves the value of Dr. Williams' Pink Pills in this trouble. Mrs. Thomas Bowen, Bath, Ont., says:—"Dr. Williams' Pink Pills have been in use in my family for years and always with good results. I believe they saved the life of my only son. At ten years of age he grew very nervous and the trouble developed into St. Vitus Dance. His legs and arms would jerk and twitch, then his speech was affected, and his condition was pitiable. Just then there came to me a little book telling of Dr. Williams' Pink Pills, and I decided to give them to him. By the time two boxes were used there was an improvement in his condition and by the time six boxes more were taken all traces of the trouble had disappeared, and he was well and strong. I have also given the pills to my growing girls, and I know of no better strengthening medicine. I may add that the same applies to grown-ups as well."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

#### Honey Production

Honey production in Canada in 1927 was 23,647,268 pounds valued at \$3,660,629, according to a statement issued at Ottawa, this being an increase of 77 per cent. over the previous year, due mostly to a favorable season but also to the greater number of colonies.

Use Miller's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of the stomach which nourish worms, and these destructive parasites cannot exist after they come in contact with the medicine. The worms are speedily evacuated with other refuse from the bowels. Soundness is imparted to the organs and the health of the child steadily improves.

#### Kills Off Noxious Weeds

Alberta Farmer Has Invention Which May Prove Valuable

A machine to dig and destroy weeds has been invented by D. W. Warner, ex-M.P., Edmonton farmer. A large rotary (horizontal) cylinder is the principal part of the new digger. Into this cylinder are inserted hundreds of large spikes. As the cylinder revolves at high speed the teeth maul the soil, biting deep into the subsoil. Clouds of earth are thrown toward the rear of the machine. The dirt settles quickly while the weeds float through the air, finally coming down like spindrift over the newly-turned earth.

Weeds with extensive root systems, such as twitch grass and thistles, will fall an easy victim to the digger. Experiments carried out recently resulted in a field being left covered with finely minced twitch grass roots, like chaff which piles up behind the threshing machine.

Time and silence occasionally succeed where all other agencies fail.

Every Home Needs Minard's Liniment.

W. N. U. 1741

### At First Signs of Pimples Use Cuticura

Anoint gently with Cuticura Ointment. After five minutes bathe with Cuticura Soap and hot water and continue bathing for some minutes. This treatment is best on rising and retiring. Regular use of Cuticura Soap and Ointment soothes and comforts tender, sensitive skins and keeps them clear, healthy and attractive.

Sample Each Free by Mail. Address Canadian Depot: Birchmount, Ltd., Montreal. Price, Soap 25c. Ointment 25c and 50c. Cuticura Shaving Stick 25c.

#### "New Canadians" Celebrate

Picturesque and Colorful Folksong and Handicraft Festival

"New Canadians" from fifteen countries of Northern Europe joined in a celebration at Winnipeg recently to illustrate the national arts and culture which they are contributing to Canadian life. The celebration which took the form of a picturesque and colorful folk song and handicraft festival, was opened by Sir James Aikins, former Lieutenant Governor of Manitoba, in the rotunda of the Royal Alexandra Hotel, where handicraft exhibits were shown representing typical European market centres.

Settlers in Western Canada from Norway, Sweden, Denmark, Iceland, Germany, France, Belgium, Yugoslavia, Czechoslovakia, Roumania, Finland, Hungary, Ukraine, Poland and Russia were represented in the display of artistic handicraft. Programs of folk songs and dances were given every afternoon and evening with 400 performers appearing in national costumes and attracting large audiences.

The festival is regarded as a unique demonstration of the contribution of the nations of Northern Europe to Canadian life and the part which they are taking in the rapid development of Western Canada.

#### Plane Loses Its Engine

When the engine fell from his airplane while the craft was in the middle of a loop at a 1,500 foot altitude, Walter Brooks, of Allentown, Pa., righted the plane and glided to an easy landing. Neither he nor his passenger, Walter Harleman was injured. The plane had just started into a loop when the heavy engine broke from its supports and dropped. It fell half a mile from where the plane landed.

#### Drives Asthma Like Magic

The immediate help from Dr. J. D. Kellogg's Asthma Remedy seems like magic. Nevertheless it is only a natural remedy used in a natural way. The smoke or vapor, reaching the most remote passage of the affected tubes, brushes aside the trouble and opens a way for fresh air to enter. It is sold by dealers throughout the land.

#### Indian Alimony

An Alaskan Indian was sentenced to pay his squaw alimony of one bull moose, properly butchered and delivered; ten mink skins, dressed and stretched; five grey fox pelts, or one silver pelt, and 100 full-grown salmon delivered in season.

If the man who wants the earth succeeded in getting it he would kick about the taxes.

#### Dressed Poultry Exports

Minister Of Agriculture To Investigate Market In England

Before sailing for England the Honorable W. R. Motherwell spent some time in Montreal discussing the situation with reference to exports to England of dressed poultry. Latest sales have been made on the basis of 32 to 36 cents per pound for 3 pound chickens, and 39 cents seaboard for 4½ pound chickens. The total export of chicken this year from January 1st to May 31st, was valued at \$111,675. It is the intention of Mr. Motherwell to devote some time to this export market situation regarding dressed poultry while in Great Britain along with other agricultural products exported, such as butter, eggs, cheese, bacon, beef cattle, etc.

#### Excellent For Croupy Children

When a child is suffering with croup it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and loosens the phlegm giving speedy relief to the sufferer. It is equally reliable for sore throat and chest, earache, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Electric Oil is regarded by many thousands as an indispensable of the family medicine chest.

#### English Pheasants For Saskatchewan

An attempt is being made in the Alsask and Lovern districts to raise English pheasants of the ring-necked variety. It is not many years since the Hungarian partridge was introduced into Western Canada. The experiment will take some years, and if successful will furnish an added attraction for bird hunters.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist's.

#### Province Has Large Surplus

The Alberta Provincial Treasurer has just been able to declare a surplus up to the end of the last fiscal year of \$279,763, which is \$200,000 greater than he estimated. The surplus is taken as a reflection of good times both in the business and agricultural life of the province.

No man or woman should hobble painfully about because of corns when so certain a relief is at hand as Holloway's Corn Remover.

A red sunrise, with clouds lowering later in the morning indicates rain.

#### Sunburn? Use Minard's Liniment.

It isn't always what a man knows but what he doesn't tell that makes others believe he is wise.

### Expenses Galore!!

Our Linotype machine arrived this week, but owing to the fact that a part was broken in shipment it will be a matter of a couple of weeks or so before we will have it set up and ready for use. In the meantime the editor is planning a holiday in British Columbia and expects to leave about the 21st of this month for that Province. If anyone has any job printing to be done we ask that they bring it in immediately so that we can have it done for them by that date. We will be back about the first week in August, but in the meantime we are leaving the "Devil" to look

after the plant and he will get out the paper, with the assistance of anyone will send in news items. If you have any printing to be done please bring in at once so that we will not be rushed at the last minute.

Wife looking at husband's noticeable beard: why didn't you shave?  
Hubby—I did.

Wife—When?

Hubby—Just after you said you were nearly ready.

## Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

## East Will Again Meet West

1. The Trans-Canadian special train takes the tourists across the Dominion by one route and back by another. 2. The scenery at Banff, enjoyed by the travellers, is among the most beautiful on the continent. 3. The trees in Stanley park, Vancouver, were growing before Columbus discovered America. 4. One of the C.P.R.'s most powerful locomotives, used for transcontinental traffic. 5. "Woody Westerners" leading a wild life.

So successful and popular have the trans-continental expeditions of past years proven and so excellent have the results been proclaimed, that this summer the Fifth Annual "Across Canada and Back" tour, promoted by Dean Sinclair Laird of Macdonald College, Ste. Anne de Bellevue, P.Q., over the lines of the Canadian Pacific Railway, will be undertaken this year, it has been announced by the C.P.R. offices in Montreal.

This tour leaves Toronto on July 23 by special train, travelling west via Sudbury, Port Arthur, Winnipeg, Indian Head, Moose Jaw, Calgary, Banff, Windermere, Nelson, Penticton, Vancouver, and Victoria; and returning east by Emerald Lake, Yoho Valley, Lake Louise, Edmonton, Saskatoon, Winnipeg, and down the Great Lakes by steamer from Port William past Sault Ste. Marie to Port McNicholl, and thence by rail to Toronto.

### Of Educational Value.

Although the traveller is interested chiefly in the attractions of the tour such as scenery, "sights" and novel experiences en route, the educational phase is one highly considered by its promoters. The bulk of the minor difficulties and differences that

arise within the Dominion are the result of lack of mutual understanding by the various component parts of the country in the problems of the others. Mutual understanding and appreciation can only be achieved by interest and knowledge, and these are best acquired by travel and personal visits to the other parts of Canada and intercourse with one's neighbours.

Passengers on board the C.P.R. special "Across Canada and Back" train will not only enjoy the glories of western scenery, the invigorating breezes of the Pacific, and the delightful voyage down the Great Lakes; but they will also become acquainted with the life of their Western compatriots. As they pass through the country they will see the industrial and agricultural activities in progress and enjoy Western hospitality as well as scenery.

Under the leadership of one of the most prominent and popular educationalists in Eastern Canada, Dean Sinclair Laird of Macdonald College, and composed chiefly of travellers from Eastern Canada, the visit will accomplish much in the way of furthering common knowledge and making the Easterner better acquainted

with the Westerner, and vice versa.

### Motoring Included.

The twenty-one day tour will give the tourists participating a comprehensive and attractive view of the west. Arrangements have been made to break the journey in many interesting ways. Motor drives will be taken between Banff and Windermere over the famous 104 mile highway; along the new "Great Divide Highway" from Field, B.C., via Emerald Lake and the Yoho Valley and Wapta Bungalow Camp and through the quaint Dakkhobor country and the fertile Okanagan valley.

Steamships will not only be taken down the Great Lakes, but also on Kootenay Lake, and across the Straits of Georgia between Vancouver and Victoria on the Pacific coast.

The equipment of the special train will include dining cars, sleeping cars, drawing room and compartment cars, a special baggage car fitted with dressing rooms and wardrobe accommodation, and observation cars, which will be an open-top type during the journeys through the mountains. The train will even have special news bulletins and receive copies of local newspapers along the route.

## Drive your own Car!

WHY walk, or be dependent on public transportation facilities, when you can drive your own car . . . go where you like, when you like, as you like.

There is no barrier of price standing between you and the ownership of a good used car.

We have a finer selection of used cars than ever . . . and the prices are the lowest we have ever been able to quote. These cars have been taken in exchange on new Chevrolets . . . checked over carefully and priced to interest shrewd buyers.

WORLD HAPPENINGS  
BRIEFLY TOLD

Royal Canadian Mounted Police in all parts of Saskatchewan are carrying on a vigorous campaign to remove firearms from the possession of aliens.

The International peace congress at Warsaw ended its session by strongly emphasizing the conference's appreciation of the Kellogg proposal to outlaw war.

Mining staking in Manitoba for the first six months of this year reached a record-breaking figure, according to the monthly statement of the Federal Recording Department.

His Majesty King George, is giving up Abergeldie Castle, which he and his two predecessors, King Edward and Queen Victoria, have had on lease for about eighty years.

A. H. Gee, Ph.D., prominent young Canadian scientist of Toronto and Yale universities, has been appointed assistant professor in the University of California. Dr. Gee is only in his middle twenties.

Negotiations for amalgamation of the Marconi and Eastern Telegraph Companies are reported to be coming to a head and an announcement is expected shortly it is understood. The negotiations include the government owned Imperial Radio it is said.

Dr. Duncan Campbell Scott, deputy superintendent general of Indian affairs, has been appointed by order-in-council to be one of the six commissioners of the Northwest Territories, in place of John W. Greenway, commissioner of Dominion lands, who died some time ago.

A bylaw passed by the Montreal City Council, in 1870, prohibiting unnecessary noises has been invoked in court. A firm of local music dealers was fined \$10 and costs for creating unnecessary noises by means of an outside gramophone apparatus.

## Want Lower Fares For Harvesters

Ask Special Rates As a Means Of Providing Help Where Needed

Special railway rates between inter-provincial points as a means of providing a more fluid harvest labor supply in the West was advised at a conference in Winnipeg of United Farmers of Manitoba, the Federal Government employment service, the Board of Trade and the Provincial Government.

Further recommendation was that the railways arrange the reduced rate tickets so that the labor supply could stop off in Manitoba and later proceed to Alberta and Saskatchewan, where the harvest is later.

## Standard Grades For Honey

The Canadian Government is engaged in plans for establishing standard grades for honey. Exports of Canadian honey have increased 200 per cent. in four years and now amount to over one and a half million pounds annually.

## Tennis.

After a brisk game of tennis prevent stiffness by using Minard's.

## Farmers' Marketing Tour

Canadian National Railways' Tour  
To Great Britain and  
Denmark, 1928

(Continued.)

Before leaving for Denmark it was our privilege to lay upon the base of the Cenotaph, in Whitehall, a wreath of poppies in tribute to the Empire's Glorious Dead. We marched from Horseguards Avenue to the Cenotaph escorted by mounted and foot police. The wreath bore the arms of every Province, and was carried by Mr. William Guild, of Kenney, Manitoba, and Mr. E. F. Augustine, of Alvington, Ontario, both of whom had lost sons in the war. Reverently they laid it at the foot of the stone while we stood bare-headed and in silence. This was our most precious duty, our proudest task, the memory of which, whatever else in this tour may be forgotten, can never fade.

We had time before entraining for Harwich to see the Houses of Parliament and Westminster Abbey. One of the most striking features of the beautiful Parliament Buildings is the towers. The Victoria Tower above the royal entrance is said to be the loftiest square tower in existence. The site of the Houses of Parliament was occupied by an ancient palace which from Edward the Confessor to Henry VIII, was the chief London residence of the reigning sovereigns. The present buildings date from between 1840 and 1850 and cost \$15,000,000. They cover eight acres and contain 1,100 rooms and two miles of passages.

We passed through both Houses. The House of Lords is much more ornate than the House of Commons. At one end are the thrones of the King and Queen, and at the other end the state chair of the Prince of Wales. In the Commons we were shown the Speaker's chair, and places occupied by Mr. Baldwin, Mr. Churchill, Mr. Ramsay MacDonald, Mr. Lloyd George and other Front Benchers of the three parties.

Westminster Hall, dating from William Rufus, is particularly memorable as having been the scene of the trials of Sir William Wallace, Charles I., Warren Hastings, and the Seven Bishops. We saw the brass plates marking the spot where the ill-fated monarch sat during his trial, also where the bodies of Edward VII. and William Ewart Gladstone lay in state.

There is no nobler building, nor one that visitors from Overseas could desire more to see than Westminster Abbey. It is built in the form of a cross, 513 feet in length and 200 feet wide across the transepts. Every English King since Harold has been crowned in Westminster Abbey. The mortal remains of kings, soldiers, sailors, statesmen, poets and illustrious men in every walk of life rest beneath its flagstones, and it contains the grave of the Unknown Warrior. The coffin rests in soil brought from the battlefields.

The beauty of the Abbey, no less than its historical associations, filled us with wonder and awe. The Chapel of Henry VIII, forming the eastern end, is the finest example in the land of the Tudor Gothic style of architecture. A superb fan tracery vaulting of matchless beauty is its crowning glory. Within the grey walls of the Chapter House, an octagonal room of noble proportions, the House of Commons was born more than 500 years ago. Near the Chapter House is the Chapel of the Pyx which the seven-locked door where the king's treasure used to be kept, and on the door human skin still adhering affords gruesome evidence of the days when punishment was not so light as now.

In the Chapel of Edward the Confessor we saw the Coronation Chair and Stone of Scone, said to have been the Coronation Stone of Scottish kings from time immemorial, but carried off by Edward I. in 1297. There the tombs of five kings and six queens in this chapel and the mutilated shrine of Edward the Confessor, erected by Henry III, in 1269, originally a golden shrine decorated with jewels and golden images of the saints. Queen Elizabeth and her sister Mary lie side by side in the north aisle of the Henry VII. Chapel.

Little did we think as we gazed at the tombs of the great, that before we returned from Denmark, there would be brought into the Abbey the body of the Empire's best beloved soldier, or that in Scotland we should lay our humble tribute on his tomb!

Our four days itinerary in London completed, we left in the evening for Harwich to embark on the motor ship "Jylland," pronounced mercifully not as it is spelt but as "Yooland." Again fortune favoured us for in this spickest of spic and span ships we had a perfect crossing over the usually ruffled North Sea. No time was lost at Esbjerg, for before 11 p.m. we were in our pullman berths en route for Copenhagen, most of us too sleepy to hear the train move on and off the rail ferries as we crossed the Great and Little Belts which interrupt the journey. By eight a.m. we were settled in our new quarters, the Hotel Cosmopolite, sensing that spice of adventure which seems inseparable from a foreign land.

But we did not feel foreign long in Denmark. The keenness and dryness of the air reminded us of Western Canada. Here too was a northern people who appreciated stoves! Nevertheless we were not prepared

for the welcome, the brotherly welcome Mr. Hogsbro Holm, secretary of the General Agricultural Council, tendered us on the Council's behalf, nor for the frank discussion on Danish agriculture which took place, followed, to our astonishment, by the presentation of a wealth of printed statistics on every department of Danish agriculture. But the frankness and fearlessness of this proceeding were explained:—"We are today looking forward to a still keener competition on the world market, but being, as we are, descendants of the old Vikings, we are looking for the struggle with joy, and today are glad to shake hands with an able and first class competitor." And we Canadians cheered to a man and woman!

Other interesting features of the meeting were a history of co-operation, questions that were answered by the leading agricultural professors in Denmark, and the vote of thanks proposed in Danish by Mr. C. Christensen, the only Danish born Canadian in the party.

In the afternoon we had the pleasure of viewing Amalienborg Palace, the residence of the Danish Royal Family, Christianborg Castle and other interesting buildings which tell the story of Denmark's gallant history. Even then we did not forget the business aspect of our tour, for the afternoon was ended by an inspection of the Milk Distributing Depot, Copenhagen.

(To Be Continued.)

## Tragedy Of The Arctic

Eskimo Mother Perishes In Attempt  
To Save Children From  
Drowning

A tragedy of the Arctic in which an Eskimo mother sacrificed her life in a vain attempt to save three of her children from drowning was described by Captain Burgess, of the steamer Ungava, just back from a cruise along the Labrador coast.

The accident occurred near Rigolet. An Eskimo boy and his two sisters were fishing at the edge of the ice when a large floe broke away and drifted out to sea with the helpless children.

The mother saw the predicament of her children just as the six-knot current caught the drifting floe and overturned it. The hardy children managed to keep their heads above water by clinging to the ice while their mother launched a leaky boat, the only one available, and with a wooden tub to bale set out to the rescue.

In the face of almost insurmountable difficulties the heroic mother took the children from the icy water and started for shore, forced to bale constantly to keep the fragile craft afloat.

Just as safety was almost assured the wooden tub, held by only one hoop at the bottom, fell to pieces in the hands of the baler and before they could reach shallow water the craft sank beneath them. All were drowned.

## Good For Paving Purposes

By means of actual tests in road construction it has been definitely established that the bituminous sands of Northern Alberta can be successfully employed for paving purposes. As the present supply of these sands is practically unlimited, their presence and use appear to have solved the problem of permanent paving and road construction in the western provinces.

## SUNDAY SCHOOL LESSON

JULY 15

## THE CONVERSION OF SAUL

Golden Text: "Faithful is the saying, and worthy of all acceptance, that Christ Jesus came into the world to save sinners."—1 Timothy 1:15.

Lesson: Acts 9:1-19a; 22:6-16; 1 Corinthians 15:8.

Devotional Reading: Psalm 119:41-48.

## Explanations and Comments

Saul the Zealot, Acts, 9:1, 2.—The "But" indicates the contrast between Philip's zeal in advancing the gospel, which Luke has just recorded in Acts 8, and Saul's zeal in retarding it. By means of a vivid metaphor, Luke shows us how Saul's presence brought terror to the hearts of the disciples whom he hunted: "But Saul, yet breathing threatening and slaughter against the disciples of the Lord, went unto the high priest." "Breathing hard, out of a threatening and murderous desire," the Greek form there warrants that translation. It is as if Saul were fairly panting, in his effort to give expression to his outraged thoughts concerning the disciples.

From the high priest Saul asked and readily obtained letters to the synagogue in Damascus, which permitted him to arrest believers of Christ, whether men or women, and bring them bound to Jerusalem. At Jerusalem the captives were to be brought before the Sanhedrin for trial. Henry Drummond puts the situation in a striking way: "In the pride of his Pharisee's heart Paul strikes out the idea to reverse the maxim of the Crucified Leader of the hated sect, and go into all the world and suppress the gospel in every creature."

There are similarities between the course of Paul and that of Felix Dzerzhinsky, the chief of the Red Terror in Russia. He was the organizer of the Soviet Inquisition, by which the Bolsheviks maintained their position against their enemies in the first years of their civil war for power. The Outlook said of him: "Incorruptible and implacable, he was the sort of inexorable judge who believed that people must be tortured and executed for the sake of an idea. He had the victims tortured to learn from them about plots against the Soviet state, to strike fear into the hearts of its foes, and so to advance the cause of Communism in Russia and—as undoubtedly he hoped—throughout the world. In certain aspects Communist fanaticism is like religious fanaticism. One of its most singular and significant products was this gentle individual and cruel inquisitor, Dzerzhinsky."

## Erecting Country Elevators

A Busy Season Ahead In Constructing Grain Elevators In Alberta

This summer will witness a great deal of activity on the part of the grain companies as well as the Wheat Pool in the construction of elevators at country points in Alberta to take care of the larger harvests which are expected. Another company which has just announced its intention to enter on a construction program is the Gillespie Grain Company. According to John Gillespie, president, the firm plans to erect six new elevators each with a capacity of 40,000 bushels.

Courtship—"Oh, if he'd only go home!"

Marriage—"Oh, if he'd only come home!"

## DELEGATION OF ROTARIANS

Here is the largest delegation of Rotarians ever to leave Europe for the North American continent, and who chose to travel by the St. Lawrence route and through Canada to attend the 19th Rotary International Convention at Minneapolis. There were 250 in the party, and they represented 14 nations. Inset is Capt. E. F. Summers, commander of the White Star liner "Albion," holding a China Rotary wheel presented to him by Rotarians from Czechoslovakia, as a memento of the voyage. The photograph was taken on the Albion on which the delegation travelled.

## Big Power Development

Development Of 39,000 Horsepower  
On Churchill River Is Promised

Initial development of 39,000 horsepower at Island Falls, on the Churchill River, is promised in an announcement made by the Churchill River Power Co., Ltd., a company allied with the Whitney interests in developing the Flin Flon mining properties and which supply power to the Flin Flon.

While the initial development is not on the scale of some of the bigger power projects on the continent, even in its first stages, the power plant at Island Falls will be by far larger than any now existing in Saskatchewan.

At present Regina has the largest power plant in Saskatchewan, with a capacity of 26,500 horsepower. The one to be built at Island Falls, even at the start, could supply any two cities in Saskatchewan with all power needs and could supply Moose Jaw, North Battleford, Prince Albert and Saskatoon. The 39,000 initial horsepower will represent 21,000 kilowatts.

Under terms imposed by the Saskatchewan government, the federal government, having referred the proposition, the Churchill River Power company must reserve one-sixth of the total power developed for use of the public in Saskatchewan and sell that reserve to the public consumer at as low a cost as charged any company for like use as the reserve power must be supplied as and when required.

The Churchill River Power Company now has a registered office in Regina and from that office has issued an official warning that lands in the vicinity will be flooded and that protests, if any, should be filed on or before July 16, noon.

## Minard's Liniment for Insect Bites.

While it may be true that British law gives a man the right to open his wife's letters, yet it doesn't give him a wife who will submit to that sort of thing.

Cute in a Baby—  
Awful at Three  
—and it's Dangerous—  
by Ruth Brittain

Thumb sucking does look sweet in a baby, but it is disgusting in the three-year-old and sometimes it hangs on until fifteen or sixteen! The habit may cause an ill-formed mouth or induce adenoids; and it always interferes with digestion. Pinning the sleeve over the hand; attaching mittens, or putting on cardboard cuffs, which prevent bending the arms at the elbows, are some of the ways to stop the habit.

Another bad habit—irregularity in bowel action—is responsible for weak bowels and constipation in babies. Give the tiny bowels an opportunity to act at regular periods each day. If they don't act at first, a little Fletcher's Castoria will soon regulate them. Every mother should keep a bottle of it handy to use in case of colic, cholera, diarrhea, gas on stomach and bowels, constipation, loss of sleep, or when baby is cross and feverish. Its gentle influence over baby's system enables him to get full nourishment from his food, helps him gain, strengthens his bowels.

Castoria is purely vegetable and harmless—the recipe is on the wrapper. Physicians have prescribed it for over 30 years. With each package, you get a valuable book on Motherhood. Look for Chas. H. Fletcher's signature on the wrapper so you'll get the genuine.

## LOEWENSTEIN MEETS DEATH IN FALL FROM PLANE

London.—Captain Alfred Loewenstein, Belgian multi-millionaire capitalist, one of the world's richest and at the same time a romantic figure in finance, went to his death when, as it appears, he inadvertently stepped overboard from his private aeroplane when it was flying over the English Channel, and fell into the sea.

The British Air Ministry announced that the Belgian Croesus had been drowned.

Loewenstein, according to the Air Ministry statement, set out from London late Tuesday night for Brussels in his palatial machine, one of the most luxurious ever built. At the time of the strange mishap, he is believed to have been moving from one compartment to another and in doing so opened the wrong door; stepping outward, he plunged into space.

Another passenger on the 'plane followed Loewenstein after he had shifted from his position to speak to him. This passenger, whose name was not learned, found the door in the fuselage of the machine open and the financier missing.

He immediately notified the pilot and the 'plane landed on the Dunkirk Sands in France. Later the 'plane proceeded to the aerodrome at St. Ingvalvert, near Dunkirk.

Captain Loewenstein, who visited Canada and the United States in April, perhaps was best known for his \$50,000,000 loan offer to the Belgian Government in order that the Belgian franc might be stabilized.

Loewenstein, whose offer was refused, shot like a meteor across the horizon of European finance a few years after the World War. Leaving Brussels for London, he built a modest fortune into one of the largest financial concerns in the world but shunned publicity with consistent success until 1926.

Then the newspapers found out about his success and he became another 'Croesus' whose fortune rivalled that of Hugo Stinnes and whose affairs reached into every corner of the world.

The reporters found many colorful events in his life and many unique habits in his every-day labor. He dictated letters while shaving; his meals were occasions for discussion of business with men powerful in finance, from morning until night and often times far into the night he had secretaries and stenographers at his elbow while he carried on his business.

Aviation was one of his greatest hobbies and it became one of his greatest business assets.

## Regrets Appointment Of Viscount Byng

Has Been a Mistake Says London Daily Express

London, England.—In a leading editorial The Daily Express indicates it greatly regrets the appointment of Viscount Byng, former Governor-General of Canada, as Commissioner of the Metropolitan Police to succeed Sir William Horwood, who is retiring.

"Nobody questions his splendid war record," The Express says, "but one man can lead only one life."

"We feel very strongly there has been a mistake on both sides and only Viscount Byng's voluntary resignation of his office can rectify it. That magnificent force, the Metropolitan police, should have at its head a young man of enthusiasm, initiative and vision combined with driving force."

The impression is growing here that Viscount Byng will withdraw his acceptance of the commissionership of the Metropolitan Police if the present criticism in the press and the political circles of his appointment continues. The objections to his assumption of the post are that he is too advanced in years for an arduous position in which he has had no experience, and on these grounds members of the House of Commons, particularly the Labor members, and a number of newspapers are criticizing his appointment.

## Goes Over Niagara Falls

Jean Lussier Successfully Performs Daring Stunt

Niagara Falls, N.Y.—For the third time in history man conquered the mighty Niagara when Jean A. Lussier, 36-year-old French-Canadian now living at Springfield, Mass., went over the Horseshoe Falls on the Canadian side in a specially constructed rubber ball while a crowd of 150,000 people lining the river banks on either side, cheered and applauded him.

The start was made from Cayuga Island, about three miles above the falls, at 2.30 o'clock and Lussier was rescued from the bridge eddy below the falls at 3.20 o'clock by William Hill, daring riverman, alone in a rowboat. At first it was feared the giant ball might be carried down stream into the rapids. Lussier plunged over the brink at three o'clock.

When Hill reached the ball it was right side up and it was a matter of only a few minutes until it was towed to shore and opened.

The first to greet Lussier with a resounding smack on his cheek was his sister, Madame J. P. Cautiere, of Sherbrooke, Que.

The only bruises Lussier suffered in his perilous journey were of minor nature. There was a small mark on his right temple, another on his left shoulder, and a spot on his left shoulder blade, all received, he said, in the terrific bouncing while his strange conveyance was passing through the rapids above the falls.

Asked concerning his sensations while going over the precipice, Lussier said:

"I didn't even think. It happened too fast."

## Planning Farm Credits System

Legislation Passed Two Years Ago Soon to Become Effective

Ottawa.—It is announced at the Finance Department that within a very short time effect will be given to the legislation passed two years ago and made contingent upon provincial adherence, establishing a system of farm credits. By the legislation then passed the way was paved for Federal financing of the system in the province which went in on the plan. Ontario, with a scheme of its own, will not do so, nor will Saskatchewan, which is in the same position, while Quebec has not decided as yet.

Four provinces, however—Manitoba, Alberta, British Columbia and Nova Scotia—subscribe to it. In consequence, the project will go ahead. A Loan Commissioner will be appointed, and a central organization, but not a large one, will be established at Ottawa.

The greater part of the administration, however, will be in the hands of the provinces.

## Natural Resources Question

Conference at Ottawa has Been Satisfactory, Says Manitoba Premier

Ottawa.—"The conference has been satisfactory," declared Premier John Bracken, referring to the deliberations that have been in progress here between members of the Manitoba Government and the Federal Cabinet.

"The subjects discussed and the conclusions arrived at will have to be communicated to the provincial government and until they have been consulted nothing can be said at present."

The purpose of the conference was to discuss the question of the return of the natural resources to the province of Manitoba and to explore the various problems which this matter involves.

### Problem For Ontario

Toronto.—The spread of communistic literature throughout the school sections of Northern Ontario continues unabated, according to officials of the department of education at Queen's Park. Departmental officials are making fresh inquiries regarding the activity of the communists involved in preparation for any action the prime minister may see fit to take on his return from Europe.

## SLATED TO RETIRE

Hon. Frank Oliver, Dominion railway commissioner, appointed to the board in 1923, is slated to retire this fall, it is reported, because he has reached the age limit of 75, even though he will have served only one-half of his ten-year period.

## Asks Help For Children

Widow of Captain Hinchcliffe Says They Are Unprovided For

London, England.—The Daily Mail published a complaint from the widow of Captain Walter G. R. Hinchcliffe, pilot for the Hon. Elsie Mackay on her ill-fated trans-Atlantic flight, saying that her two children were unprovided for. The establishment of a trust fund to reduce the British national debt in memory of Miss Mackay, by her parents, Lord and Lady Inchcape, called forth the letter.

Mrs. Hinchcliffe argued that while there was no legal obligation on Lord Inchcape, there was a moral one, because the whole scheme of the flight came from Miss Mackay who hired Hinchcliffe. She said she had written four times to Lord Inchcape telling him of her position and need. He replied non-committally, to the first letter, but she received no response to the others.

The government has already accepted the trust fund of \$2,500,000, which will be left to accumulate for 50 years and then be applied to the debt.

### Win Gordon Bennett Trophy

Detroit, Mich.—Unofficial check of distances indicated that the United States army balloon, piloted by Captain W. E. Kepner, with Lieut. W. O. Eareckson as aide, had won the Gordon Bennett international balloon race and given America permanent possession of the trophy. For the first time in seventeen years of competition one nation will have won the event for the third consecutive time.

## SAY IT WITH SONGS

Probably what has ever been the largest crowd to say goodbye to a departing individual, omitting royalty, was recognized at the North Toronto Station of the Canadian Pacific Railway, recently when two thousand members of the Toronto Exhibition choir sang "Bon Voyage" to their leader, Dr. H. A. Fricker, upon his leaving for England and Europe.

## An Interesting Exhibit

Improved Methods of Marketing to be Demonstrated at Western Fairs

Winnipeg.—With the object of bringing directly before the producers some of the lessons learned during the Canadian National Railways marketing tour of the British Isles last winter, the Dominion Department of Agriculture is preparing an exhibit to be shown at the fairs at Brandon, Calgary, Edmonton, Saskatoon and Regina during July.

The exhibit will be conducted in a car which the Canadian National Railways are providing and lecturers and demonstrators will be in attendance throughout. The exhibit will be in Brandon for the period of the fair. From there it will go to Calgary, July 9 to 14; Edmonton, July 17-21; Saskatoon, July 23-28 and Regina, July 30 to August 4.

Among the matters which the exhibit will stress will be the importance of marketing only the highest quality products in the British Isles and all the standardizing of grades and improving methods of marketing Canadian agricultural products so that they can meet more efficiently the intense competition of the Old Country markets. In addition to the lecturers and demonstrators provided by the Government, there will be in attendance at the exhibit at each point visited two or more of the farmers from that district who made the trip last year.

## Interested In Wireless Merger

Beatty Makes Important Submissions to British Government Is Report

London, England.—The Daily Mail says that President E. W. Beatty of the Canadian Pacific Railway, has made important submissions to the British Government embodying Canadian views concerning the rumored merger of wireless and cable companies to operate Imperial communications. Until these recommendations are sifted out, delay in publishing the terms of the settlement is inevitable, says the newspaper. No confirmation of these statements is obtainable but Canadian Press understands that any modification of terms now under consideration that might be made would likely be of small importance.

### Insect Menace Slight

Winnipeg.—"There has never been a year when the west was so free from insects of all kinds as the present," declared Arthur Gibson, Ottawa, Dominion entomologist, on arrival here en route home from a tour of inspection of the west. There was no sign anywhere of any insects harmful to crops, he stated.

## USE CASH FROM GRAIN OVERAGES FOR RESEARCH

Ottawa.—The Federal Government has decided to devote the entire amount of money resulting from the overages in Canadian terminal elevators toward research in connection with grain problems. In making this announcement, Hon. James Macdonald, minister of trade and commerce, stated that the decision had been made in view of the ever increasing number of problems respecting the production and marketing of Canadian grain.

The expenditure of monies resulting from overages will be under the direction of the National Research Council and the order-in-council relative to the disposal of such monies along these lines has been passed. Expenditures will be utilized not only to subsidize and extend the various researches now under way in universities and research laboratories, now conducting such work, but will make possible research on many pressing problems for which money heretofore has not been available.

In the opinion of the government, monies accruing from the grain trade should, as far as possible, go toward the solving of the problems of that trade. Among the most important problems in connection with which research has been going on for some time past is that of combating rust. The amount of money from overages in Canadian terminal elevators at the disposal of the government for the purposes mentioned is \$219,000.

## Food Shortage In Russia

Soviets Buying Huge Amount of Grain in Baltic

London, England.—Huge purchases of wheat on the Baltic Exchange by Soviet Russia are reported in London, traders here expressing the opinion that the movement indicates a severe scarcity of food in Russia.

The quantity in Liverpool for spot cash amounts to between 150,000 to 200,000 tons, and Baltic London brokers expect Russia to buy almost as large a quantity again.

The prices agreed to without negotiations thus far have been uniformly as much as 90 cents per quarter above the market rate, which is felt to indicate a tremendous immediate demand for grain.

London brokers say they have reports of long bread queues and a painful shortage of food in Russia which, before the war, was one of the world's largest exporters of grain.

Russia has not bought such supplies of wheat since the winter of 1919-1920.

## Fraudulent Currency

Fake American Bills Being Circulated in Winnipeg

Winnipeg.—United States wires a few days ago carried warnings of the currency of fraudulent \$20 bills. Some of them have turned up here. Several merchants have been victimized in the last few days by the fake notes.

Bills used here are valid one dollar bills cleverly changed to give the appearance of the note of larger denomination.

Police fear an influx of the fraudulent notes during the next week when the Norse convention will draw hundreds of United States visitors. Merchants have been warned.

### Fire in B.C. Mine

Fernie, B.C.—Fire in the tipple of the Corbin Coals, Ltd., at Corbin, B.C., completely destroyed the structure.

This disaster will, it is believed, cause the closing down of that colliery and throw a couple of hundred men out of work. No estimate of the loss has been made.

The Lister Institute of England is experimenting with a number of guinea-pigs to discover health value of different varieties of apples.

## The Interesting Story of Three British Immigrants Who Have Met With Success In Canada

Premier King pointed out the other day that there are, in the Canadian Government, three ministers who came to Canada as British immigrants: Mr. Dunning, from England; Mr. Forke, from Scotland; and Mr. Heenan, from Ireland. In a cabinet of eighteen members, three Old Countrymen hold the important portfolios of Railways, Canals, Immigration-Colonization, and Labor. And they came to the Dominion without financial backing.

The experiences of Mr. Dunning, Mr. Heenan and Mr. Forke are of interest not only because they represent England, Ireland and Scotland, but because they set their feet upon somewhat different political ladders. Mr. Dunning climbed up by way of his prominence in business and agricultural organizations; Mr. Forke by way of agricultural and municipal experience; Mr. Heenan, by way of municipal and labor affiliations. Mr. Dunning achieved political prominence at an early age; Mr. Heenan in middle life; Mr. Forke, as an older man. They afford three interesting and quite different studies in immigrant success.

Mr. Forke came to Canada in 1882 at the age of twenty-two, took up land in a remote part of southwest Manitoba, and in five years was interesting himself actively in municipal affairs. He was twenty years reeve of Pipestone Village eleven years secretary of the Manitoba union of municipalities and finally its president. But he had been in Canada thirty-nine years and was sixty-one years of age before he was elected to the House of Commons. The following year he became House leader of the Progressives and in 1926, at the age of sixty-six became a minister in the King Government.

Among the immigrants who came to Canada in 1902 were Peter Heenan and Charlie Dunning. Heenan was 28; Dunning only 17.

Heenan, born in Ireland but schooled in England, and for a time a professional football player, had been working as engineer and diver for a construction company in Costa Rica, had been attacked by yellow fever, and had examined the rival claims of Canada and South Africa as to healthier climate. He chose Canada, tried an Alberta ranch, preferred being a locomotive engineer, became an alderman of Kenora and chairman of the Association of Locomotive Engineers, and 17 years after coming to Canada was elected to the Ontario Legislature. Six years later he was elected to the Dominion House from a constituency larger in area than Great Britain. And in 1926, 24 years after his arrival in the Dominion, and at the age of 52, he became Minister of Labor.

Dunning's career was meteoric. He told the House the other day how, on first coming to the Dominion, he worked for the summer on a western farm at ten dollars a month. The next year his father came. And by working at wages which never exceeded a dollar a day and board (the equivalent of perhaps two dollars), they laid by, in a summer and winter, enough money to bring out the mother and five sisters. But at 26, nine years after his arrival, Dunning appears in the picture as vice-president of the Saskatchewan Grain Growers' general manager of the Saskatchewan Co-operative Elevator Company, and member of the Canadian Council of Agriculture. At 31 years of age he became Provincial Treasurer of Saskatchewan; then Premier of that Province, and in 1926 became, like Heenan, a Minister of the Dominion Government, age only 41.

In these three careers there is a lesson of hope for every immigrant and every intending immigrant. Not everyone can hope to be a Cabinet Minister; but all can hope for a greater degree of final comfort and prosperity than they are likely to attain elsewhere. Toronto Star.

Passenger on a branch line railroad (to conductor): Why does the engine always let out such a piteous howl when we pass this spot?

Because it was here the engineer first met his wife?

W. N. U. 1741

### Canada Stands Fifth In Milk Production

United States At Head Of List With Germany Second

The eighteen largest milk producing countries of the world have, according to latest returns, 67,822,743 milch cattle. Of these the United States leads with 22,290,000. Germany is second with 10,066,517, then France, 7,701,410, Great Britain and Ireland 4,358,279, and Canada is fifth with 3,894,311.

The total output of butter is 4,534,851,758 pounds of which Canada makes 272,209,287 pounds, and of cheese 2,278,918,895, and of this Canada's share is 172,248,373. The United States is head of the list in butter-making, with Canada sixth, and Germany heads the cheese list with Canada fifth. The per capita consumption of milk in the United States is 55.3 gallons, and in Canada 43.2 gallons.

### Winnipeg Newspaper Union

Collarless Slip-On Dress

Collarless Slip-on Dress, closed on left shoulder. Waist is gathered into a two-piece circular skirt. Sleeves, gathered into wristbands, perforated for short sleeves. Long sleeves are also perforated to be made of two materials. For ladies and misses.

### World's Greatest Creditor

In a report to the Economic Committee of the League of Nations at Geneva, some remarkable figures were disclosed. Although the United States are certainly growing in importance, Great Britain is still the world's greatest creditor; her foreign investments are roughly given as \$1,000,000,000. The United States investments are given at \$2,800,000,000.

### LONG RECORD OF SERVICE

W. H. D'Arcy, general claims agent of the Canadian Pacific Railway, at Winnipeg, who retired from the services of the Company, July 1. Mr. D'Arcy's record with the Railway dates back to 1882, a year after construction of the transcontinental line was commenced.

### Poultry House Flooring

Cement Floors Give Trouble On Account Of Dampness

Cement flooring for the poultry house has the merit of durability and it does not harbor vermin, but many poultry keepers complain that it gives trouble in winter and spring on account of being continually damp. At the Charlottetown Experimental Station the cement floor was given a coat of roofing paint but it did not reduce the dampness to any appreciable extent as the litter soon became damp and unfit for use almost as quickly as where the floor was left without treatment. In another house a wooden floor was built and laid in sections two inches above the cement. This treatment, according to Mr. J. A. Clark, the superintendent, in his report for 1927, was very effective, the section remaining dry and requiring cleaning only about half as many times as the other sections of the same house that had the cement floor only.

### E. P. Ranch Ships Stock South

Important Shipment Of Pure Bred Stock Goes To California

Another important stock shipment has left the E.P. ranch for the Kenwood stock farms, Kenwood, California. This is the third shipment made to the famous stock centre, and consisted of seven cows, five Short-horn bulls, and five yearling bulls. Some of these were stock imported from the royal farm in England. James Watson, of the E.P. ranch, accompanied the bunch as herdsman, and will look over various prominent stock farms while in California.

### WESTERN HOTEL NOW COMPLETE

Still more majestic, standing alone, the Banff Springs Hotel, guardian of the Canadian Rockies, is again prepared for the summer rush of tourists and passing travellers. Many alterations have been made in the construction of the hotel while an additional wing has been built.

New swimming pools are a still further attraction, both warm and cold baths being built. Altogether there is a splendid and dignified atmosphere surrounding the new Banff Springs Hotel, which is rather that of an old-world mansion than of an hotel.

The old golf course has been renovated and enlarged from a nine hole to an 18 hole course, under the encircling shadow of the mountains.

## Trade Within The Empire Is Being Furthered Through Efforts Of the Empire Marketing Board

The development of trade within the Empire is a matter which, during recent years, has been given the very earnest attention of all those countries making up the British commonwealth of nations. It is felt that the fostering of intra-Empire trade will open up opportunities for trade relations that will not only serve to bring more closely together the various parts of the Empire; but as well, afford such direction to production and consumption of those commodities for which the various countries concerned are best suited to produce, that the well-being of the whole Empire will be greatly added to. With this object in view, the Imperial Economic Conference, of which Canada is a member, in 1923 appointed the Imperial Economic Committee to study the possibilities for doing something to stimulate marketing within the Empire. As a result of their first and subsequent meetings, the Empire Marketing Board was created.

The Empire Marketing Board as constituted is an official non-political body, and the membership is so arranged that, though limited for the sake of efficiency, no part of the Empire is unrepresented, and its chief function is that of advisor to the Secretary of State for Dominion affairs, in the administration of the annual vote of £1,000,000 as granted by the Parliament of the United Kingdom. The Imperial Economic Committee and the Empire Marketing Board are closely related, partly because the Empire Marketing Board is charged with the endeavor to give effect within the terms of the Vote, to many of the recommendations of the Imperial Economic Committee and partly because certain men are members of both bodies.

The Committee proposed in the first instance that a very considerable proportion of the grant should be devoted to promoting Empire buying in the United Kingdom, and a minor portion reserved for the assistance of research. Later, the Board modified in the direction of an increased expenditure for the assistance of research.

The value of consumer publicity early engaged the attention of the Board and it was with the object of creating consumer interest in the matter of Empire trade expansion within, that the Board at the outset dealt with a publicity problem, both novel and difficult. The Board appreciated the fact that its main function in the field of publicity was to create a background against which individual governments, or countries, or trading interests could throw into relief the claim of those commodities

in which they were interested. This principle has been permanently adopted. Thus, while the Board may draw attention in general terms at the proper seasons to particular varieties of Empire produce, it is not called upon to undertake or subsidize special campaigns on their behalf. The effect has been that the Board has been engaged less in furthering directly, the sale of individual articles of Empire produce, than in creating a consciousness of Empire among a public that might thus be led to respond more freely to the direct appeals of other advertisers. Already, there are evident signs up and down Great Britain of a fresh and growing interest in the possibilities of Empire development and trade, and as well, an obvious preference for Empire products where quality and cost are in proper relation.

Consumer interest in the work of the board is now growing with amazing rapidity. Within recent months, approximately 15,000 schools have applied to the Secretary to be placed on the regular mailing list to receive the Board's posters as often as they are issued. Already 1,140 poster-boards or frames have been erected in different parts of the country, and a further 160 frames are in course of erection. To indicate the interest and value placed in this Empire publicity scheme, we cite the British Electrical and Allied Manufacturers' Association, which has made proposals involving the erection of sixty advertising frames in their factories, so that the Board's objective may be displayed for the benefit and education of the vast army of industrial workers. Moving picture centre panel poster frames now being considered for erection at the chief railway stations in London, so as to reach the eyes and arrest the attention of the millions moving in and out of the largest single consuming area in the world and Empire.

The effectiveness of such an elaborate publicity effort in promoting buyer action is quite apparent. Nevertheless, it should be repeated that the whole scheme would be worse than futile if in urging the policy of voluntary preference, we would be advertising inferior goods and this we would be doing, if the goods or products on offer from Empire sources are not adequate, both in quality and volume to meet whatever competition they are likely to encounter.

Those of us who have been privileged to visit the leading market centres in Great Britain and those of us who have had to do in a practical way with the sale of Canadian products in the British market, realize how sound is the idea that quality and volume represent the only conditions on which Empire produce may be given a privileged place in the consuming centres of Great Britain. And further, it is necessary that in the matter of volume, the same shall be uniform and regular. None understands better than Canada, with her long winter months and her comparatively short growing season, the difficulties encountered in developing uniform product volume. Nevertheless, regularity of volume is essential to obtaining voluntary preference, and we have to face the issue as it stands; and we have successfully overcome greater difficulties in times past.

The Bible contains no words of more than six syllables.

"Jump! There is a mattress at the bottom."—Kasper, Stockholm.

**NURSES know**, and doctors have declared there's nothing quite like Aspirin to relieve all sorts of aches and pains, but be sure it is Aspirin the name Bayer should be on the package, and on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box:

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trade mark.

### CHAPTER XXVII. —Continued.

Dr. St. John would not have been critical of his wife if she had chosen to follow some profession. He would have liked that. He did not believe that every woman had to be run in the domestic mould, making the coffee and ironing shirts—anyone could do that! But the companionship—the good fellowship of a wife—how he craved it! And now that craving was slowly turning to resentment. Other men had wives—he had a queen of chatter, a hoarder of trinkets, a bridge player, a tea drinker!

The telephone rang.  
"Yes, it is Dr. St. John. Who is speaking?"

"Jack—Jack Doran."  
"Eva's brother? On your way through! Come along, yes, we are at home—I'll drive down for you—only thirty minutes. Grand Trunk? I'll be there—yes, Eva will come, too."

The Doctor hurried into the living-room and spoke to Eva. "Jack is at the station. Get on your things," he said, "my car is at the door. Leave the crowd here."

"We will all go," cried one girl, with very bare shoulders; "I want to see Eva's good-looking brother. Let's give him a regular send-off."

The crowd arose flutteringly, all chattering. There was something particularly irritating to the doctor in their idleness, their gaiety, their lack of seriousness. "Stay here," he said curtly; "Jack Doran has no desire to be met by a crowd of strange

ers for whom he cares nothing. He wants to see his sister."

Eva turned on him indignantly. "Well, I like that," she said. "Remember, a station is a public place—anyone can go. Come on, kids, every one of you."

The doctor took his wife's arm with a suddenness that surprised her and said, "Hurry Eva—have you no sense?"

"You have no right to be rude to my friends," said Eva peevishly, when they were on their way to the station; "you acted abominably just now!"

"Oh forget it!" the doctor said, "and try to get a serious thought in your mind for once. Your only brother is going to war, and the chances are against your ever seeing him again. Have you nothing to say to him? Forget that cackling gang for half an hour. Their feelings are not hurt."

Eva looked at him in speechless amazement.

Jack had hoped that he might see his sister and the doctor alone. He wanted to tell his sister about Helmi. The boy's heart craved companionship—he must tell someone. But the whole crowd swarmed around him with their incoherent, gaily, their senseless chatter, and the few minutes went by uselessly. The Doctor was furious, and it was against Eva that his rage was directed. Here was her only brother going away, and she had not a serious thought in her head, not one loving, personal word for him.

The Doctor took Jack's hand at the last as they stood at the steps of the train. "I am going over too, Jack," he said; "it is going to be a long fight, and we will all be needed. I cannot stand back and see other men go. I am proud of you, Jack. Can I do anything for you?"

A great impulse to tell the Doctor came to Jack but the conductor was calling and the train bell was ringing.

"I wish I could have had a good talk with you," Jack said, as the train began to move.

That night when her company had gone, Eva came into the Doctor's room. His light was still burning, and she knew he was not asleep. Eva, sinuous and graceful, in a light gown of cream satin, was determined to check what was the first sign of insubordination in her husband. Her married friends assured her that if a man is "let away" with an exhibition of temper or crossness he will be worse the next time; so Eva had her mind made up to be very haughty and coldly proud. She would forgive him, but only after a distinct understanding.

"Well, what have you to say?" she asked him, with the queenly manner that had never failed.

"Nothing," he answered, "only that it is time you were in bed."

"Do you mean to say that, after insulting my guests?"

The doctor laid down his book. "If your guests had any sense, which they have not, they would have stayed here and let you and me go alone. They don't know Jack and care nothing for him. They raced to the station because it was something to do, something to relieve the dullness of their vacant minds. I told you to hurry if you wanted to see your brother. Now you can be as hurt over it as you like. I am tired trying to understand you, and have come to the conclusion that there is nothing to understand, in fact you have ceased to interest me."

Eva had not expected this. "What do you mean?" she said at last.

"Just what I said! Selfish people pay for their selfishness in the end, though they may be able to run on credit for a long time. The world is at war, Eva, but you do not know it. While you and your overfed friends were eating and drinking downstairs, boys were dying in mud and cold to save the world, brave boys like Jack. Nurses were binding up shrapnel wounds while shells fell around them; refugees were pouring into England to be cared for by the women of England. No, Eva, your type might last a long time in peace, but it shows up badly in time of war."

Eva was looking at him now through half-closed lids. Dull anger burned in her eyes.

"You are no longer a child, Eva, though I can hardly say you are a woman. You are a perfect form to hang clothes on, and a very graceful dancer, and a very free spender on yourself—and if you thought you

could get away with it right now you would give a violent exhibition of anger. But something tells you it would be quite useless. You will never be an old woman, Eva; don't be afraid of that. Old women are patient, kindly, motherly people, ready to help, ready to warn, anxious perhaps too anxious. You know the type, and utterly despise them. You were quite ashamed of my dear old mother when she came to visit us, she was so old-fashioned and quaint to you and your friends. No, you will never be an old woman, Eva; in another fifteen years you will be a stale novelty."

She turned and left him without a word. Reaching her room, she flung herself across the bed and wept tears of sheer vexation.

The next day the doctor told his wife that he had enlisted for service overseas. Eva hoped and expected right to the last minute that he would apologize and beg to be forgiven, but she was disappointed, and the hardest part of it was that he did not seem to care.

### CHAPTER XXVIII.

The people of Bannerman have not forgotten April 25th, 1915. The day began peacefully enough, with only a reddish tinge in the sunshine to mark it from other days, and that blinding heat which seems more oppressive in April than in July. The Spring had come early in Northern Alberta and now the budding of the earth was advancing with feverish haste. The red tassels of the poplars were paling into feathery gray, and already some were to be found littering the woodland paths, their work was done, they could take their rest.

Of all the spring birds that had come back to gladden the land the crows were most in evidence for they had come in thousands from the south, filling the air with their clamor. In every flock that came, a noisy minority seemed to dominate, sometimes dividing from the company to seek their own way, and then finding their following not so great as they had expected, returning noisier than ever to demand that another vote be taken because the first one had not been constitutional. Vastly entertaining is the crowd, and full of a caprice that marks him for a blood brother of the human family. But he is welcomed by the northern dwellers—not because of himself or his habits, which are reprehensible, but because he is a portent of the Spring. (To Be Continued.)

## RED HOT JULY DAYS HARD ON THE BABY

July—the month of oppressive heat; red-hot days and sweltering nights; is extremely hard on little ones. Diarrhoea, dysentery, colic and cholera infantum carry off thousands of precious little lives every summer. The mother must be constantly on her guard to prevent these troubles, or if they come on suddenly to fight them. No other medicine is of such aid to mothers during the hot summer as is Baby's Own Tablets. They regulate the bowels and stomach, and an occasional dose given to the well child will prevent summer complaint, or if the trouble does come on suddenly will banish it. The Tablets are sold by Medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The right possessed by the British public to take gold to the Mint to be coined into sovereigns was withdrawn in 1925.

## SUMMER COMPLAINT Nearly Lost Her Little Girl

Mrs. Theodore Rivett, Anthony, Ont., writes: "Last Fall I nearly lost my little girl as she was suffering terribly from summer complaint. She became very thin and weak; had no appetite, and could hardly walk across the room without falling down. At last my mother advised me to get a bottle of

and after she had taken a few doses she was relieved.

I also found it a grand remedy for cramps, and would not be without a bottle of it in the house for anything."

Has been on the market for over 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

## Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

### HOW TOOTHACHE STOPS

In toothache we find a fight progressing between the invading organisms and nature's little warriors, the phagocytes.

Then what decides the tide of battle? Should the invaders not have made too great headway through the breach in the pulp wall, the chances are that the little warriors would win the day, and the tooth get well, especially if the tooth cavity were cleansed of all decay, by this means destroying the hosts of the invading organism. Nature needs assistance at times you see.

But should this aid be not forthcoming, the attacking organisms pour through the breach in increasing numbers, and discharge their poisons, while nature, making a desperate effort to stem the tide, rushes her little warriors into the conflict in such vast numbers as to prove her own undoing. In this wise: that the tiny blood vessels within the pulp chamber become congested resulting in an increased pressure that flattens the thinly walled veins at the constricted opening which serves as both entrance and exit to the pulp chamber. Consequently, the flow of blood outward is progressively slowed up and ultimately stopped, and pulp strangulation results.

So the pulp dies; and the gallant band of little warriors is annihilated; then, with the pulp death the pain ceases. But is the danger past? Not at all.

For the invading hosts, finding in the dead pulp ideal conditions of heat and moisture for their propagation and growth, multiply exceedingly, and pour through the exit of the chamber into the body tissues carrying their poisons, as well as other products of decomposition of the lifeless pulp.

Thus, coursing through the body fluids, they become at once a menace, not only to the health and life of the tooth, but of the individual as well.

### Regina College Extension

Tenders are being called for the construction of the Regina College Arts Building, to be completed this year with auditorium capacity of 800. It will be built of Tyndal stone and brown brick in the Tudor collegiate style.

**Powerful Medicine.**—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

It is estimated that 2,500,000 workers quit their jobs or change them each year in U.S.

There is nothing more uncertain than a sure thing.

Minard's Liniment heals cuts, bruises, etc.

## Little Helps For This Week

"But ye, brethren, be not weary in well doing."—Thessalonians iii. 13.

Life is not living  
Just for today;  
Life is not dreaming  
All the short way.

It is living for others,  
To lighten their load;  
It is helping your brothers,  
And trusting in God.

—Hoadley.

Life is made up, not of great sacrifices or duties, but of little things, in which smiles and kindnesses and small obligations given habitually win and preserve the heart and secure comfort.

—Sir Humphrey Davy.

Education is wonderful. It tells you a hors d'oeuvre on the menu is a slightly shopworn sardine.

The monetary unit of Holland is the guilder, or gulden.
